

## ZipShow – the CCTV widget that’s a great promotional tool for your business!

- Promote your business with a live CCTV camera feed
- Personalised CCTV viewer - all set up for you!
- Hidden Log On & Security
- Have your Name in the Viewing Window
- Standalone Widget - No Setup required

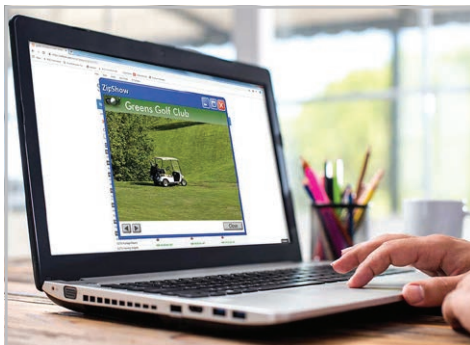

The ZipShow CCTV widget is a great way to take your business to your customers by giving them a bird's eye view of one of the CCTV cameras on your system.

## More Details

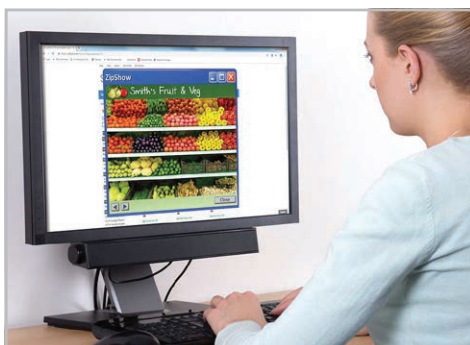

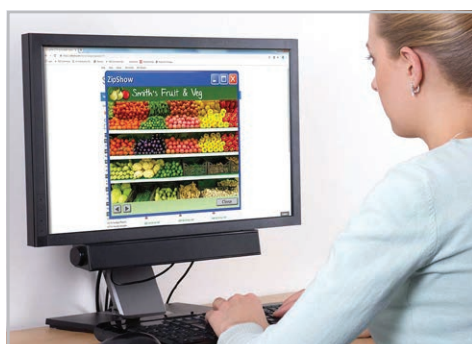

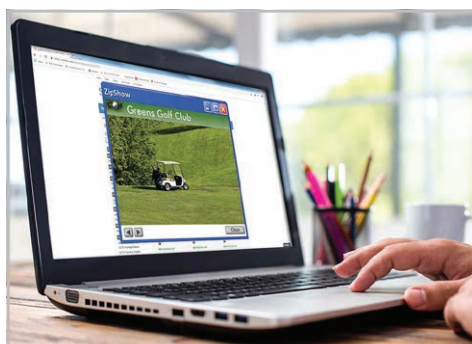

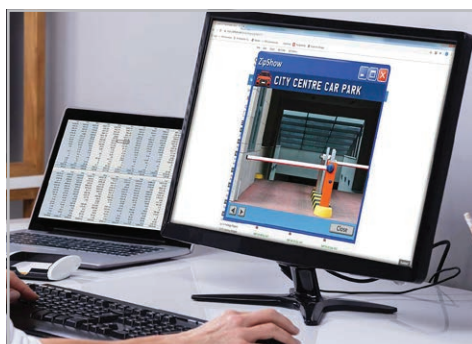

For example a golf course might show the current course conditions, a theme park might show the crowds waiting for the latest attraction. Simply supply us with your chosen security settings and we'll encrypt the widget to show your customer the chosen camera feed with your business details at the top of the viewing window. Plus the widget doesn't even need installing; it's a standalone exe file that can easily be distributed on a promotional CD or USB stick. It's supplied pre-populated with (all hidden) log on ID, password and IP address. All your customer has to do is simply click 'view' and they will see live images from a pre-determined CCTV camera. Perfect promotional tool for any company from pubs, shopping centres, stables etc. Uses are only limited by the imagination!

## Bespoke design

We can customise the viewer with a company logo, name, website URL and colour scheme for a truly bespoke CCTV viewer. Once you purchase the widget we'll email you with the precise info we need.

## System Requirements

Operating System	Microsoft Windows 7 or later
Processor	Intel i3 minimum
RAM	32Bit Windows: 4GB / 64Bit Windows: 8GB

Hard Disk	Requires approximately 15Mb
Internet Connection	Required when viewing a DVR Remotely

## Licensing

Licences	Unlimited
Support Period	6 Months ticket based support*

\*Downloads within the support period are available via your personalised Control Panel.

## FAQs

Is there a simple way to “share” one of my live CCTV camera feeds with someone else?

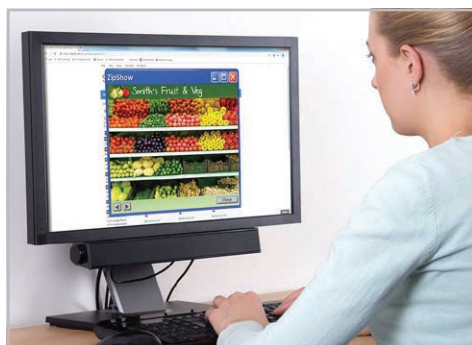

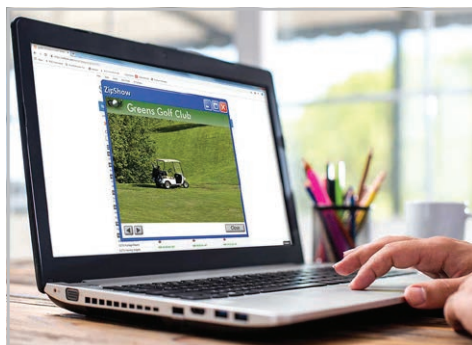

### Answer

Yes, just as long you provide them with a copy of your bespoke ZipShow widget they can view live images every time they open it up. This is a great promotional tool for your business. In the past it has been used by theme parks so potential customers can watch the new ride, golf courses have used it for members to view live weather conditions and stables have used it so owners can check in on their horse.

Will my other camera feeds be kept private and secure with ZipShow?

### Answer

Absolutely, all you need to do is supply your customer with the viewing widget and when they open it up they can see a pre-determined CCTV camera. The log on ID and passwords setting are all hidden from them.
