

Remotely View & Control your alienDVR CCTV footage with this FREE Android Tablet App

- Remote viewing of your CCTV on your Android Device
- Full or Quad Screen Viewing
- Record footage locally to your tablet
- Control gates and other relays remotely
- Playback CCTV recordings and save video clips
- Full screen control of live PTZ cameras

The alienDVR Android app provides remote viewing, PTZ control, relay control and even quad viewing of a camera recording all on to the device. Use your device to monitor your CCTV system on the move, record footage and even control relay items like gates, barriers etc. The perfect accompaniment to an alienDVR!

System Requirements

Android Version	Supports Android 3.0 or later*
Compatible Devices	Android Tablet
Space Required	Installation requires approximately 10MB on a phone or 29MB on a tablet, additional space is required for long term storage of images and video snippets
Internet Connection	WiFi or mobile internet connection required for live view and remote access
Bandwidth	For best results we recommend setting the DVR's sub-stream to CIF @ 12fps which requires 256kb/s per channel in live view**

*Android 7.0 or later recommend.

**on high speed connections the stream quality and frame rate can be increased.

Licensing

Licences	Unlimited
Support Period	3 Months ticket based support*
URL	https://play.google.com/store/apps/details?id=com.systemQ.alienDVR

*Downloads within the support period are available via your personalised Control Panel.

DVR Models: MegaHero / MaxPix / MaxPix+

FAQs

Can I remotely view and control my alienDVR CCTV camera system over the Internet using my android device?

Answer

The FREE alienDVR android app allows you to view your cameras and control your DVR from anywhere in the world. Just search for "alien dvr" in the Google Play Store or scan the QR code supplied.

You'll need to make sure your alienDVR has already been networked and setup for remote viewing then simply enter your DVR's information and you're good to go.

What internet speed do I need stream live video from an alienDVR?

Answer

The quality of image you can stream depends on your available bandwidth and the bit rate of the live images you are trying to view. For best results we recommend setting the DVR's sub-stream to CIF @ 12fps which requires 256kb/s per channel in live view.

If you have a higher speed Internet connection you can increase the stream quality and frame rate to suit your needs. A 720p 12fps image for example would require roughly 2MB/s per channel.
